ARITCO LIFTGUIDE GUIDE TO GENERATING PARTNER LINKS

https://liftguide.aritco.com/

ARITCO™

Step 1.
If there are no other parameters yet, for example for AHL https://liftguide.aritco.com/, add "**?**" to the end of the URL

Step 2.
If there are other parameters in the URL, example for APLAC is https://liftguide.aritco.com/?m=7000&dt=large&f=delta_dark_grey_vinyl&a=1100x1480&ch0=2400&ch1=2240&ch2=2400&ch3=2400&ch4=2400&ch5=2400&wh=half, add "**&**" to the end of the URL

Step 3.
Add "**r=**" to the end of step 1 or step 2. The "r" stands for reseller

Step 4.
Add the reseller name after **r=**, for exemple: **?r=BestReseller**

ARITCO™

As soon as a user has entered the LiftGuide via a link such as the one above, the partner name is always pre-populated during this session, regardless of whether the user selects other lifts in the LiftGuide.

Note that the **?r=** or **&r=** value is no longer at the end of the URL when the user starts configuring the elevator properties. Don't worry, the name of the dealer will still be pre-populated.

If you leave LiftGuide and then click on a "normal" URL without the added value **?r=** or **&r=**, the partner field will be emptied.

ARITCO™

Good luck out there!
